

Come to the Friday Night Talk!

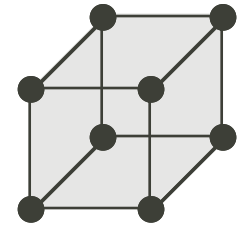

# Counting Across Dimensions At Least Twice

27

16

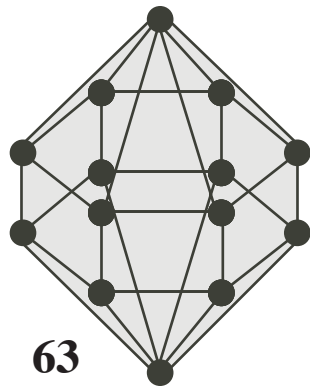

27

given by dr. sarah-marie belcastro  
(Smith College)

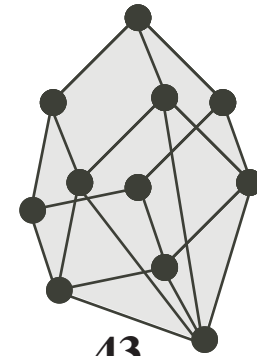

When? 8:00 PM Friday June 3rd, 2011

Where? Thomas Building Room 101

Why? 'Cause you'll have FUN!

63

43

We will investigate two dimensional progressions of objects—how are these objects formed? What are they? What kinds of sub-objects do they have? How many sub-objects do they have? That last question produces some nice answers... and opens a new, currently unanswered question! (Maybe you can be the one to answer it!)
